SUMMARY

Data Analyst with hands-on experience using SQL, Python, BigQuery, Tableau, Excel, and GitHub to clean, analyze, and visualize data. Developed end-to-end analytics projects focused on customer retention, sales performance, business intelligence reporting, and financial market analysis. Skilled in transforming raw data into actionable insights through dashboard development, exploratory analysis, and data storytelling. Combines strong analytical problem-solving abilities with eight years of operational experience in fast-paced environments.

EDUCATION

Southern New Hampshire University

Master of Science, Cybersecurity

Johnson & Wales University

Bachelor of Science, Foodservice Management

Johnson & Wales University

Associate of Science, Culinary Arts

EXPERIENCE

Bartaco

- Managed high-volume operations while maintaining accuracy in fast-paced environments
- Monitored inventory and product usage trends to optimize supply levels and reduce waste
- Collaborated with team members to improve workflow efficiency and operational performance

Joey's Restaurants

- Maintained quality standards and operational efficiency in high-pressure environments
- Coordinated with cross-functional teams to ensure successful service delivery

Lion and the Rambler

- Assisted leadership with implementation of new operational processes and procedures
- Maintained inventory oversight and quality control standards

PROJECTS

Sales & Revenue Performance Dashboard | SQL, BigQuery, Tableau

- Analyzed sales, profit, customer, and regional performance data using SQL and Tableau
- Built an interactive executive dashboard featuring revenue, profit, margin, order volume, and customer metrics
- Identified high-performing regions, profitable product categories, and revenue trends
- Developed interactive filters and dashboard actions to support business decision-making

Telco Customer Churn Analysis | SQL, BigQuery, Tableau

- Analyzed customer churn behavior across contract types, tenure groups, internet services, and payment methods
- Identified month-to-month contracts and lack of technical support as major churn drivers
- Built interactive Tableau dashboards to visualize retention risks and customer segments
- Presented recommendations to improve customer retention and reduce churn

Stock Market Exploratory Data Analysis | Python, Pandas, Matplotlib

- Performed exploratory analysis on historical stock market data using Python and Pandas
- Evaluated market volatility, daily returns, and long-term performance trends
- Created visualizations to identify significant market movements and risk patterns
- Generated business-focused insights from large financial datasets

Bellabeat Fitness Data Analysis | Excel, SQL, Tableau

- Cleaned and analyzed over 30,000 smart-device fitness records
- Examined user activity, sleep behavior, and wellness trends
- Built Tableau dashboards highlighting engagement and activity patterns
- Presented data-driven recommendations to support marketing and customer engagement initiatives

TECHNICAL SKILLS

Data Cleaning

Exploratory Data Analysis (EDA)

Data Visualization

Statistical Analysis

KPI Development

Business Intelligence Reporting

SQL

Python (Pandas, NumPy, Matplotlib)

R

BigQuery

Relational Databases

Tableau

Excel

Google Sheets

Google Colab

GitHub

Tableau Dashboards

Interactive Reports

Executive KPI Dashboards

Business Performance Reporting
